# BACK DOOR STORES

Our back door stores provide an outside space for wet or muddy boots and all those bits that end up by the back door. Also ideal if you have a small garden and looking for somewhere to store those garden items.

Strong and sturdy, made from pressure treated timber and then finished off with a curved galvanised steel roof. The solid doors have galvanised hinges and a pad bolt that can be secured with a padlock (padlock not supplied). It comes with a decking floor that is raised slightly from the ground, allowing air to flow underneath.

The Tin Hat store complements our Tin Hat range of sheds, yet this is small enough to go by the back door or in a small garden.

External width: 4ft (1.2m)  
External depth: 2ft 8in (81cm)  
Eaves height: 5ft 7in (1.7m)  
Maximum height: 6ft 3in (1.9m)

Designed for self install; this can easily be carried out by a competent DIY person, a full set of self install instructions are supplied.

Tool rack shown in picture can be added for an additional extra, please see or accessories

Price includes flat pack delivery\* but not installation

\* Price is for mainland UK, anything above Edinburgh/Glasgow or

outside the UK will incur an additional cost, please contact us for prices
