Overview

A gorgeous design, The Wimbledon has been designed specifically to have a 3ft veranda to the front.

In addition to providing ample storage or work space internally, The Wimbledon has a 3ft veranda to the front with enough space for a tired gardener, or two, to sit and enjoy their garden at the end of a busy day, or just a place to take a break from your busy day and have a coffee.

The Wimbledon is available in 4 sizes and provides plenty of space and head room. To the front the standard door with integral window and two single opening windows either side mean that plenty of light gets into the shed. The windows would be two double windows with one opening casement in each, in the two largest sheds.

Available in 4 build options (Posh, Very Posh, Comfortably Posh and Unbelievably Posh), and 3 roof options

If you order this shed in our Posh build in 8ft x 7ft size we will donate 5% of the sale to the National Garden Scheme. We have a number of these sheds placed in gardens around the country, all supporting the National Gardens Scheme charity. [Click here](#) to see where you can visit to see our lovely Wimbledon shed, in a lovely garden.

Shed Measurements

The Wimbledon

External Width	8ft 3in (2.53m)	8ft 3in (2.53m)	12ft 3in (3.7m)	12ft 3in (3.7m)
External Depth	7ft 3in (2.21m) inc 3ft veranda	9ft 3in (2.8m) inc 3ft veranda	9ft 3in (2.8m) inc 3ft veranda	11ft 3in (3.4m) inc veranda
Eaves Height	6ft 10in (2.09m)	6ft 10in (2.09m)	6ft 10in (2.09m)	6ft 10in (2.09m)

Ridge Height	8ft 2in (2.5m)	8ft 2in (2.5m)	8ft 2in (2.5m)	8ft 2in (2.5m)
Door	2ft 2in	2ft 2in	2ft 2in (0.67)	2ft 2in (0.67)
Opening - Width	(0.67m)	(0.67m)

Opening - Height	(1.73m)	(1.73m)		(1.73m)
Window - Single	1ft 5in (0.67m)	1ft 5in (0.67m)	N/A	N/A
Window - Double	N/A	N/A	3ft w x 26in h (0.9m x 0.65m)	3ft w x 26in h (0.9m x 0.65m)

Please note - Our sheds are handmade and as such sizes may vary slightly, please allow for the roof overhang.

Floor

Comfortably Posh - Floor

Your shed comes with a very solid floor. The floor is made up of two layers 12mm weather-proof plywood (WBP) with insulation board sandwiched between the two. A coat of wood preservative on the top surface to give an extra layer of protection. This plywood is fitted to 30mm tanolised timber bearers and then a waterproof membrane is fitted between. This waterproof membrane also laps up around the edges where it is joined with the same membrane that is fitted within the walls.

The key to all outside buildings and the associated damp issues is to ensure that there is a good airflow under the shed. To this end the support beams built into the floor need to sit on a solid surface. There are many suitable surfaces, shingle, slabs, concrete, decking, tarmac to name but a few, these are what we call the sub base. We are happy to fit this, for a small additional charge, or it can be prepared in advance of us coming

Walls

Comfortably Posh - Walls

They are built using a unique triple wall construction developed by us, this is now being copied by other shed manufacturers, but we believe that ours is the best.

The initial structure for the walls comes from a frame work, this is built using good quality 38mm x 50mm redwood timber fully finished with rounded corners and a smooth surface. The framework is screwed together, rather than being nailed, this gives additional strength to the shed. Redwood timber is used for its superior strength and quality of finish over the more often used white wood.

To this is fitted a 6mm WBP plywood skin in the inside and on the outside a breathable waterproof membrane is fitted on top of the framework. 12mm redwood pressure treated cladding with a TGV joint is fitted. 20mm insulation panels are fitted within the framework and then a 6mm external grade plywood is fitted to the inside with skirting and architrave fitted around the doors and windows.

Roof

Comfortably Posh - Roof

Each part of the shed is important but obviously the roof initially takes the most weather. The Posh Shed Company roofs are solid and dependable as well as being attractive. The main beams holding up the roof are either 75mm x 50mm or 100mm x 50mm depending on the size of the shed. The main roof panel is built using two layers 12mm wbp plywood with insulation board sandwiched between. This has soffit boards pre-fitted on either end to ensure a snug fit. The roof has a layer of waterproof membrane fitted and then a top layer of either felt shingles, cedar shingles or man-made slate depending on your taste

Doors

Comfortably Posh - Doors

These are not stuck on after thoughts on The Posh Company Sheds. All our doors are made in robust frames which form part of the sheds construction. Doors are hinged inset in the frame and when closed keep the water where it belongs, outside.

With double glazing in the window the doors come with a 5 lever sash lock and come with a choice of handles, black, chrome or brass effect. The door is built to the same specification as you would expect to fit in a house.

Windows

Comfortably Posh - Windows

Our windows are made in robust frames which form part of the sheds construction. The windows are hinged inset in the frame and when closed keep the water where it belongs, outside. Double glazed panels fitted, and to finish off your window we offer a choice of black, silver or brass effect for the casement stays and catch.
